

HOSPITAL HAPPENINGS

February 2012

Three thousand, nine hundred and thirty-nine! You read it right; we did 3,939 blood draws during the MMH Health Fair and Early Blood Draws. WOW - that's a lot of people! No wonder Colorado is one of the healthiest states in the United States. It's because of people like you who are interested in their health and who are taking an active role in prevention and early detection. Thank you for your participation!

As well as the huge number of people who had their blood drawn, we had over 1,200 people attend the Health Fair. They took advantage of many different health screenings and received handfuls of literature, health information, and free toothbrushes, hot/cold packs, pens and lots more. We had over 20 booths staffed with knowledgeable people who were eager and willing to answer your health related questions.

As always, MMH could never provide such an incredible service to our community without the help of countless volunteers. I would like to list and publicly thank the people who so generously gave of their time and knowledge;

- Over 60 Health Fair Volunteers!!
- Breast Cancer Support Group of Southwestern Colorado aka Bosom Buddies
- Center for Mental Health
