Rehabilitation

often focuses on

- **Physical therapy** to help your strength, mobility and fitness
- **Speech-language therapy** to help with speaking, understanding, reading, writing and swallowing
- **Occupational therapy*** to help you with your daily activities
- Treatment of pain

There are many components that comprise a well rounded comprehensive rehabilitation program. From initial management to final recovery, a treatment program must be flexible to adjust to the needs of each individual patient.

RIDGWAY REHABILITATION CENTER

physical therapy

service population

Our experienced physical therapy staff can evaluate and treat a variety of musculoskeletal injuries and conditions, as well as post-surgical cases utilizing manual therapy techniques, therapeutic exercise, and modalities. Sports medicine rehabilitation is utilized to treat injuries related to athletic activities with particular emphasis on knee, shoulder, spine, ankle and elbow injuries.

speech therapy

Treatment for communication and swallowing disorders depends on the problem and its severity. Speech-language pathologists use computer technology, voice or language exercises and other training to help people develop effective communication skills.

Physician Referral required

Post surgical

- Joint replacements
- Trauma

Orthopedic / Neurological

- Arthritis
- Back and neck injuries
- Spinal dysfunction
- Sports injuries
- Balance problems

Stroke

Swallowing disorders

Candice Scott, LeAnn Lane, Allison Gelvin, BJ Chorak (Office Coordinator)

LeAnn Lane, MSPT

Leann graduated from the University of Osteopathic Medicine and Health Sciences in Des Moines, IA with a master's degree in physical therapy. She likes to treat using a combination of biomechanical retraining and a hands on approach using manual therapy skills and myofascial release. Personal interests include running, snowboarding, windsurfing and family time with her husband and two boys.

Candice Scott, PT

Candice graduated with a physical therapy degree from California State University of Long Beach and has specialized in orthopedic physical therapy. Her treatment philosophy focuses on manual therapy combined with an individualized comprehensive exercise program. Candice is an avid skier, and enjoys mountain biking, traveling, and time spent with her husband and two young daughters.

Allison Gelvin, DPT

Allison is a Colorado native, growing up in the Vail Valley. She received her doctorate degree in physical therapy from the University of Colorado Health Sciences Center in Denver. Her professional interests include sports medicine, neurological rehabilitation, and manual therapy. In her free time, she enjoys road biking, hiking, camping, and traveling.

Micah Magee, MSCCC-SLP (not pictured)

Micah completed her undergraduate training at Hardin-Simmons University in Abilene TX and her graduate studies in Speech-Language Pathology at Northern Arizona University. She is VitalStim Certified and enjoys working with stroke patients and swallowing disorders. In her leisure time, Micah loves to mountain bike, downhill ski, and relax with her family.
